Time Management Adaptability
Problem Solving
Effective Communication

Pritam

Frontend Developer(React)

Professional Summary

Skilled and result-oriented Front-End Developer, currently refining expertise at Masai School with hands-on experience in HTML, CSS, JavaScript, Tailwind CSS, React.js, Chakra UI, Firebase, and Data Structures and Algorithms. Focused on continuous learning and passionate about building creative, dynamic web applications. Eager to apply technical skills in a collaborative, growth-driven work environment while enhancing expertise in innovative projects.

Projects

GlowNest-Ecom [Live Demo Link](#) [Github Repo Link](#)

JavaScript React HTML5 CSS3

Responsive Web Design Tailwind CSS

- Collaborated with designers and stakeholders to transform project requirements into a functional and visually engaging e-commerce platform using React.js.
- Developed reusable, scalable, and high-quality frontend components for GlowNest-Ecom, ensuring seamless and intuitive navigation.
- Implemented responsive design techniques to guarantee optimal performance across devices, enhancing user experience and engagement.
- Integrated frontend components with Tailwind CSS and server-side APIs to support dynamic product filtering and sorting.
- Conducted thorough testing and debugging to ensure reliability and stability, optimizing the application for speed and scalability.

MovieZone [Live Demo Link](#) [Github Repo Link](#)

JavaScript HTML5 CSS3 Responsive Web Design

- Developed a fully responsive movie app using HTML, CSS, and JavaScript, ensuring seamless viewing across various device sizes.
- Implemented search functionality, enabling users to easily find movies by typing in the search bar.
- Integrated sorting features, allowing users to organize the movie list by title or release year for enhanced user experience.
- Developed category filtering options, enabling users to display movies by selected genres such as Action, Comedy, and Drama.
- Utilized Bootstrap for responsive design, ensuring optimal performance on both mobile phones and desktops.
